

SHELL VIALS AND CAPS

Shell Vials

- > For the 1ml Shell Vials a plug with and one without insertion barrier for Micro-Inserts is available. The one without barrier shows a better valve effect with regard to the formation of a vacuum.
- > Star-shaped diaphragm enables easy penetration of the PE-Plug.
- > Recommended for HPLC usage.
- > Shell vials and the appropriate plugs can also be supplied as a 2in1 KIT.
- > A handy and inexpensive vial/closure combination for uncritical analysis.

Labmarker Chromatography Vials are packed in Cleanrooms and we guarantee this high hygienic standard. Additionally, tamper-proof evidence is given by the shrink-wrapping of the PP-box. Their cover enables reclose ability in order to avoid further contamination.

The zip-lock PE-bags with the tear-off foil strip for our seals with regard to tamper-proof evidence and reclose ability. Printed batch numbers on each zip-lock bag guarantee traceability.

LABMARKER is an ISO 9001:2015 certified company. Batch numbers guarantee a 100% traceability. Pre-sealed and pre-installed combinations available on request. Barcode labelling.
